Wormeries

for organic food waste processing

“Enterprise Plants have been providing Excel London with a commercial wormery since 2007. They manage the whole service for us and carry out regular visits to process food waste. Enterprise Plants ‘worm guy’ continues to talk through correct practices with our on site catering personnel to ensure we capture the highest possible amount of food waste.”

Sophie Male, Excel Exhibition Centre, London

- On site organic foodwaste processing
- Fully managed service with regular reporting
- Adds to Corporate Social Responsibility Policy
- Reduces waste removal costs
- Production of valuable soil improving wormcast

Flowering displays

"We have orchid displays at many of our reception/executive areas. Enterprise offer a wide range of displays and containers to suit all styles. Their maintenance service is excellent with the orchids changed as required without any fuss."

Wade Farley, Senior FM, Sky

- Large range of styles, shapes and colours to enhance reception areas, board rooms, restaurants etc
- Longer lasting and more environmentally friendly than cut flowers
- Each display comes with a donation and certificate on your behalf to the World Land Trust to preserve endangered habitats
- Displays regularly maintained and replaced as necessary

Interior planting

“We have just had an extra 200 plus people take over some of the office space and their perception of the building is enhanced by the plant displays which make the Atrium look stunning.”

Bill Cumber, Food Standards Agency

- Improved office environment
- Happier staff
- Peat free displays
- Guaranteed quality
- One point of contact, one contractor
- Improved corporate identity

Green walls

“I have been delighted by Enterprise for several years. Discrete and trustworthy staff give us the confidence to allow unsupervised access. The quality of their work and the imagination they use in providing solutions means I hope we continue the relationship for many more years.”

A private client, London W1. Name withheld by request

- Increased insulation to buildings causing reduction in heating and cooling requirements and consequent reduction in CO₂ emissions and costs
- Enhanced noise reduction
- Increased biomass in urban areas providing habitats for wildlife
- Improved air purification and humidity levels through photosynthesis of plants
- Retro fitting possible
- Enhances building quality and BREEAM rating
